DETAILED ACTION

The instant application 10/598,875 is presented for examination by the examiner. Claims 25-27, 29, 32-49, 54, and 62 have all been canceled during prosecution. Specifically claims 26, 54, and 62 have been canceled after final. Claims 28, 30-31, 50-51, 55-59, and 63-67 have been amended to place the application in condition for allowance.

Response to Amendment

The present claim amendments overcome the previous USC 103 rejections.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Independent claims 50, 58, and 66, recite "the at least one rule consists of four rules, said four rules consisting of a number of alphabetic characters of a user identification (ID), a number of numeric characters of the user ID, a data size for fingerprint authentication, and a data size for voice print authentication". This limitation which states that the rule must **consist** of all four of these rules in conjunction with all of the other claim limitations is not found in the prior art. While each of these rules are known in the art, Examiner could find no obvious rationale in the prior art to combine them all with the federated computer environment as disclosed in claims 50, 58, and 66.

As per independent claims 51, 59, and 67, the combination of "after said obtaining the authentication policy of the second server, registering by the first server the authentication policy of the second server within the first server" and "obtaining, by the first server, a server address of the second server, wherein the authentication policy of the second server matches an authentication policy of the first server; transmitting, by the first server to the second server via the server address of the second server, the input authentication information" with all of the other claim limitations is not found in the prior art. In the federated environment as claimed, the first server registers other servers authentication policies, thus knowing which type of credentials to acquire from a user, and by the second server's address, sends the users credentials to the second server, for the actual authentication.

Allowable Subject Matter

Claims 28, 30, 31, 50-53, 55-61, and 63-69 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
